

Tech Avenue

Leading the Innovation Drive.

ABOUT US

TECHAVENUE is a Client centric services firm defined by “HOW” we solve challenges. Whether a client is facing an immediate business challenge, trying to increase the value of their company or protect against future risks, Tech Avenue designs, develops, and executes tailored solutions by assembling the right combination of expertise. We build on this experience by collaborating to create innovative, customized solutions, and strategies designed for today’s ever-changing business environment. This gives our clients unparalleled insight and experience. At Tech Avenue, we know that Innovation drives results.

Our Vision is to be a preferred global Services and Solutions company. We will win in the marketplace by listening to and understanding our customers and working with our valued partners to deliver innovative solutions that provide real business value

OUR VISION

To enhance the business growth of our partners with innovative solutions and develop deliver, market-defining, high-quality solutions that create value as well as reliable competitive advantage for our clients in all our chosen domains.

OUR
MISSION

Tech Avenue
Offers expertise in
the following areas

CUSTOM APPLICATION DEVELOPMENT

TechAvenue develops as well as participates in innovative custom software application solutions that best meet clients' complex business needs, budget, schedule, and existing IT infrastructure.

ARTIFICIAL INTELLIGENCE SOLUTION

Practically every industry has something to gain from artificial intelligence and machine learning.

We can help you to develop solutions embedded with AI capabilities across numerous verticals that can help your Organization unlock new possibilities.

CYBER SECURITY AND INTRUSION DETECTION

The new reality of dynamically shifting and targeted cyber-attacks and Advanced Persistent Threats (APTs) is forcing organizations to constantly adjust their protection strategy and properly respond to the ever-changing cyber threat landscape. Detecting cyber threats as they develop is key in defending against them and ensure that your network and data is not compromised.

TechAvenue Security Information & Event Management (SIEM) tool allows you to always remain one step ahead of the latest cyber threats and will immediately recognize them, providing you with an overall picture of your network, all the time.

SYSTEM INTEGRATION

Adopting new technologies and processes means often overcoming complicated software integration challenges, both between your existing applications as well as external systems.

Our software integration engineers have the necessary skill sets to handle your integration obstacles, from architecture design, testing to execution.

AUTOMATION AND VIRTUALIZATION

For an enterprise, there are countless uses for virtualization. Virtualization also helps with the ongoing effort to consolidate resources, and cut down costs.

Enterprise Managers are also banking on increased automation to help organizations meet challenges with fewer staff members without losing on the amount of work done.

DATA MINING

Data mining is the process of analyzing data from a large range of sources and collating this information into useful business intelligence.

The data gathered is examined to discover prevalent market trends, predict future prospects, opportunities and assist with driving revenue and cutting costs

No matter where you are in your digital journey, TechAvenue can help you envision, design and deliver to realize your businesses true potential: Innovative Business Solutions - Better Customer Experiences - Improved Process Efficiencies - Greater cost reductions to increase business value

Reliable

At TechAvenue we believe in building and maintaining long term relationships with all our clientele.

Secure

Our team of dedicated professionals not only deliver progressive solutions with unmatched security but also maintain excellent workmanship that provides peace of mind.

Experience

With our team of seasoned professionals who have a knack for solving complex solutions, we strive to get things done the way that is most effective.

3 words that
best describe
our approach
and our team

FOCUSED, SOUND & INNOVATIVE

We help our clients lead into the future by solving their most complex and mission-critical issues through customized solutions

RIC

Research
Innovation &
Collaboration

At **TeachAvenue** we are deeply convinced that **Research Innovation and Collaboration** is crucial to long term success of any company. All market leaders reinvest certain percent of their profits into research as they see this as an investment into their continual growth. Some organizations may be tempted to cut down the expenses on research & innovation, which can result in short term relief but eventually leads to bigger problems in strategic perspective.

IMPORTANCE OF RIC

Informal R&D has existed at least since the first person experimented with methods of knapping flint to make stone age tools. In a formalized sense, it became part of the arsenal of the modern corporation beginning with the creation of industrial labs in the late 19th century and today it comprises about 2-3 per cent of the GDP in advanced economies.

Companies today spend considerable resources on targeted investigative undertakings in an effort to make discoveries that can help develop new products or way of doing things or work towards enhancing pre-existing products or processes.

PMO

Project Management Office

REQUIREMENTS

DESIGN

IMPLEMENTATION

TESTING

DEPLOYMENT

MAINTENANCE

worldwide statistical data suggests, only half of all projects succeed, in theory, the typical organization could achieve the same delivery rate with only half the effort. More realistically, an improvement of only 10% per annum for most organizations would represent a hefty sum, deserving some quality attention. Or, more would be achieved with the same resources. we understand the business, technology and cultural needs of projects and resource led organizations.

Tech Avenue offers its Project Management as a Service to its partners and clients across a diverse range of domains. By applying consistent project management practices and governance, we enable improved project delivery, visibility and control.

We take into account the organization's project management maturity, processes, methodologies, culture, technologies and governance structures to ensure that projects have the required visibility and delivery is on time.
